

SQM makes a successful presentation at Hortifair 2007

Another year on, this time during October, Hortifair Fair 2007 took place in the city of Amsterdam, Holland. 900 companies from more than 50 countries attended, making the event the highlight for the world-wide agricultural industry. Naturally **SQM** was part of this success.

Particularly noteworthy was the participation of our strategic ally Yara, with whom **SQM** collaborated with the launch of new products which make even more complete our portfolio of nutritional solutions such as **Ultrasol™ K Acid** and **Ultrasol™ K Plus Acid** and **Ultrasol™ Magnum Flex**. The acid characteristics of these products help to improve the availability of nutrients, the absorption of nutrients through the leaves and the stability of most pesticides.

Key **SQM** executives attended the event and talked with many of those attending the fair, as a way of strengthening links with customers and thus getting to better understand their interests and concerns regarding the development of the agricultural market and our company.
